

## coronavirus absence quick guide

### what to do if

I have coronavirus symptoms

I have tested positive for coronavirus

Somebody I live with has coronavirus symptoms

Somebody I live with has tested positive for coronavirus

Test and trace have told me that I have had 'close contact' with somebody with a confirmed case of coronavirus

I have travelled and have to self-isolate

Should I get a test

### action

- » You shouldn't attend College
- » You should get a test
- » Your whole household self-isolates while waiting for a test result
- » Inform College immediately about test result
- » Access online learning if well enough

- » You shouldn't attend College
- » You should self-isolate for at least 10 days from when symptoms started or date of test
- » Inform College immediately about test result
- » Your household self-isolates for 14 days from when symptoms started or date of test
- » Access online learning if well enough

- » You shouldn't attend College
- » Household member with symptoms should get a test
- » Your whole household self-isolates while waiting for a test result
- » Inform College immediately about test result
- » Access online learning

- » You shouldn't attend College
- » Your whole household self-isolates for 14 days from when symptoms started or from date of test
- » Access online learning

- » You shouldn't attend College
- » You should self-isolate for 14 days even if you test negative during the 14 days
- » Household doesn't need to self-isolate, unless they are deemed to have had 'close contact'
- » Access online learning

- » Check FCO advice before travelling
- » You shouldn't attend College
- » You should self-isolate for 14 days even if you test negative during the 14 days
- » Access online learning

- » Only people with coronavirus symptoms should get a test
- » If you don't have symptoms you are advised not to get a test, even if you are a 'close contact' of someone who has tested positive for coronavirus

### back to College

When your test comes back negative and you are symptom free for 48 hours

When you complete 10 days self-isolation and have been without a fever for at least 48 hours.  
You can return to college even if you have a cough or loss of smell/taste. These symptoms can last for several weeks once the infection has gone

When household members test is negative, and you don't have symptoms

When you have completed 14 days self-isolation, even if you test negative during the 14 days

When you have completed 14 days self-isolation, even if you test negative during the 14 days

When you have completed 14 days self-isolation, even if you test negative during the 14 days

As long as none of this applies to you please come into College
